

Stonebound 6mm
Rustic 10mm
Terrabase Grid System

Diveway and Patio Buildup - Stonebound

1) Top Layer is 18mm Resin bound for Driveways or 16mm Resin bound for Patios and Paths.

2) Middle Layer is Tarmac laid at 70mm for Driveways but can be 50mm for Patios and Paths.

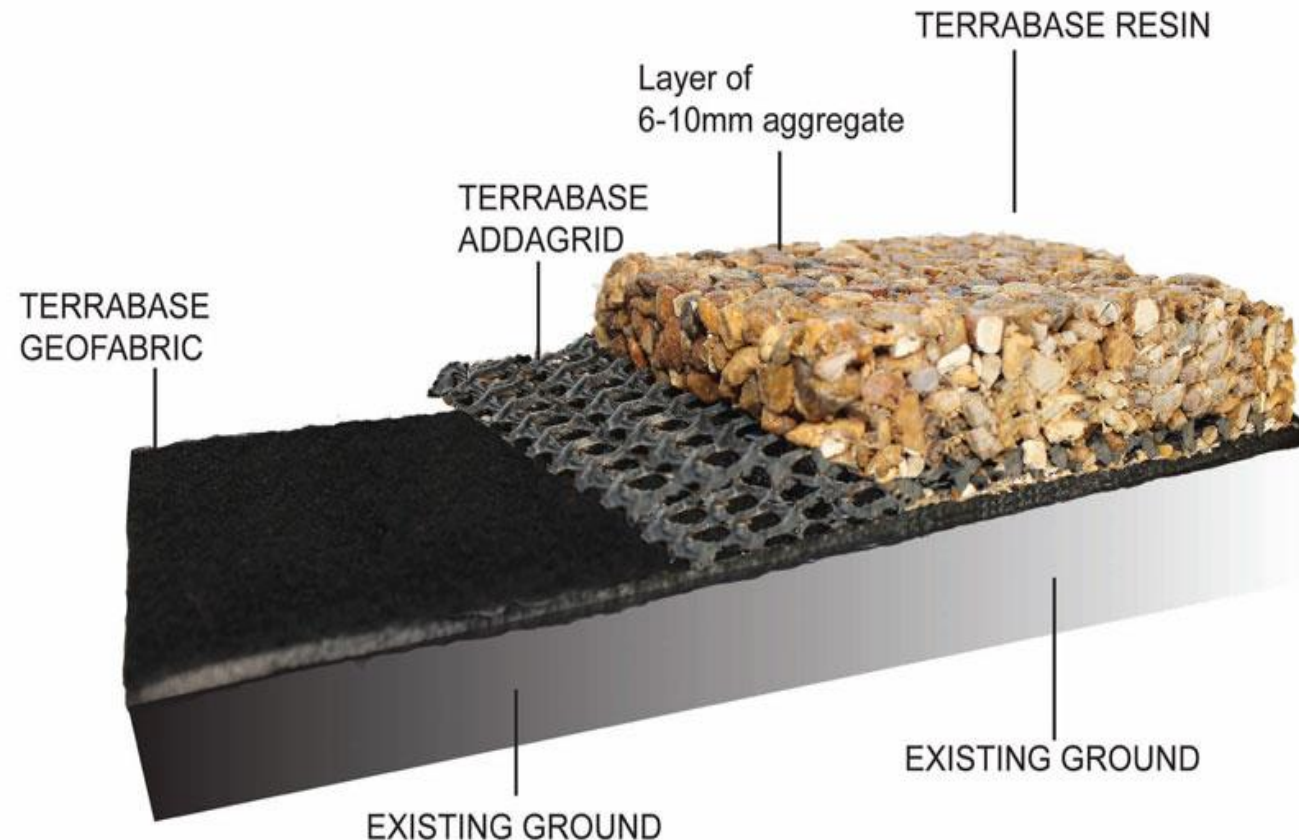

3) Bottom layer is Type 3 MOT (can be Type 1 MOT) Approx 100mm, this will keep it SUDS compliant.

Membrane optional

Terrabase Build up

Buildup of Rustic system with Terrabase Grid (same build up applies to the Stonebound Range on Terrabase system)

1) Terrabase system is made up of the Grid and Geofabric as seen on diagram.

2) Top Layer is 30mm of either Stonebound or Rustic Range Resin bound

3) Bottom layer can be anything but would need to be 100-150mm of Type 3 or 1 MOT for a driveway.
